At the Austin League, we volunteered for 4 divisions competing all together, that is 48 teams total! Team member Darean was a score tracker, and team Coach Jina was Field Technical Advisor.

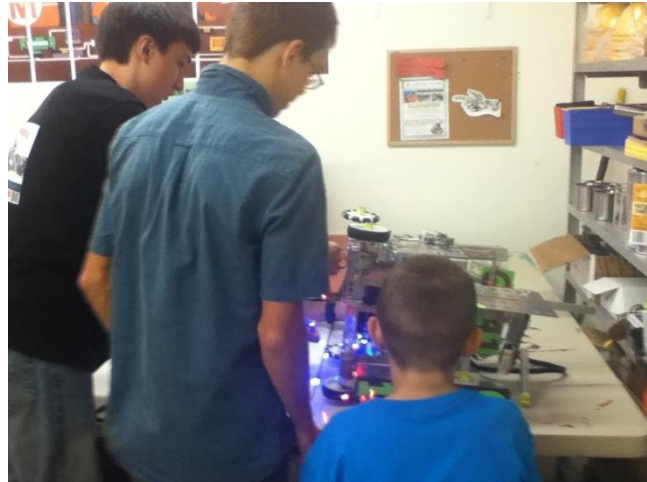

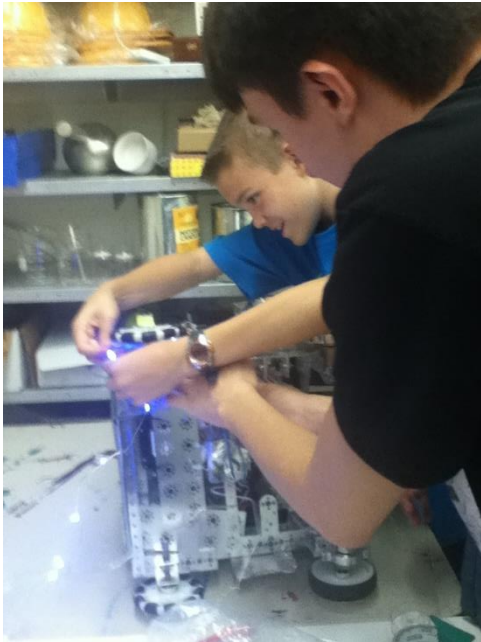

Austin posted their League's scores online at www.ftcscores.com

We saw a few robots able to fill the cryptoboxes, others scored the relic, and we even saw a mascot!

We met a new member, Caleb, who joined us from the NB Science Fest! We also added blue and red LEDs to the robot, and we also did lots of driver practice.
