

We participated in the annual San Antonio Library's Mini MakerFaire, sharing about the FIRST Robotics programs with Lego robots. Kids had fun playing with our remote-control and Rubik's cube-solving robots.

Across from us was a Ghostbusters display, looked interesting.

There was a robot drum demo called Pony Trap, and a Girl Scout troop inviting people to help build free libraries, along with other booths.

The TechnoWizards, an FLL team associated with FTC team Makkbots, had a nice outreach exhibit across from us sharing WeDo robot activities and their FLL project presentation.

FTC teams Clash of Coders and Screaming Chickens also let kids drive their robots around and brought some of their pit displays.

We were checking out Clash of the Coder's robot and driver station.
Their team is coached by UTSA engineering professor parents!
