

Our table display, sharing about FIRST robotics.

Letting kids scramble Rubik's cubes to let the Lego robot solve, and remote-control driving Lego robot rovers, also showcasing sensor technology. Our neighbors also had some remote-control robots.

Several FIRST robotics teams were also playing and demoing robots. FTC Team PhiloBots and an FLL team both just came back from the Houston World Championships. FRC Lady Cans, FTC Bots of Glory, and FIRST in Texas were also there.

Very cool!

There was a lot going on, including fire demos, a drone course, and LED music, among other things!
